

Boole Server named "Cool Vendor" by Leading Analyst Firm

Vendors selected for the "Cool Vendor" report are innovative, impactful and intriguing

Luxembourg – April 22, 2010 – Sunfive S.A. announced today that [Boole Server](#) has been recognized as one of the 5 worldwide "Cool Vendors" by leading analyst firm [Gartner](#), Inc., in its "[Cool Vendors in data and Infrastructure Protection, 2010](#)" report, published on April 14, 2010 by Ray Wagner, Neil MacDonald, Eric Ouellet, Jay Heiser and Ruggero Contu. Boole Server is the only European vendor included in the report.

In Gartner's assessment of these Cool Vendors, "one recurring trend among them is an intense focus on integrating the security requirements of complex, heterogeneous business and computing environments, without unnecessary disruptions to network and business operations." According to the report, which is available to Gartner clients or for purchase online "pure-play startups and other niche vendors, rather than established major players, continue to drive much of the innovation in data and infrastructure protection".

"We have created Boole Server to provide organizations with an innovative solution for sharing and accessing sensitive information within, and beyond, their business while maintaining security and control" said Andrea Nacmias, director of Sunfive S.A.. "We believe Boole Server's inclusion in the Cool Vendor report by Gartner is an important confirmation that our unique and dynamic technology can have a high impact on our customers' data protection and sharing capabilities."

About Boole Server

Boole Server is a secure, scalable system designed to safeguard any sensitive data, while allowing it to be shared with staff, partners and customers, as and when needed. With Boole Server, organizations can ensure that their confidential information and intellectual property will not be forwarded, stolen or lost in transit or on the server either through malicious or human error. It only allows authorized users recipients to use, edit, copy, print or view specific files, while its advanced auditing features record each file and user activity.

With offices across Europe (United Kingdom, Italy, Switzerland and France), the Middle East (United Arab Emirates) and Far East (Shanghai), Boole Server currently serves various sized clients in different market sectors Worldwide.

About Gartner's Cool Vendors selection process

Gartner's listing does not constitute an exhaustive list of vendors in any given technology area, but rather is designed to highlight interesting, new and innovative vendors, products and services. Gartner disclaims all warranties, expressed or implied, with respect to this research, including any warranties of merchantability or fitness of a particular purpose.

Gartner defines a Cool Vendor as a company that offers technologies or solutions that are: Innovative, enable users to do things they couldn't do before; Impactful, have, or will have, business impact (not just technology for the sake of technology); Intriguing, have caught Gartner's interest or curiosity in approximately the past six months.
